- Help Cradle Tanks for Transport
- Aids in Stabilizing tanks for transport

### Installation Guide - Mounting

Tank Bracket has 3mm guiding holes spaced 122mm apart on the back of design.

1. Drill out guiding holes with proper diameter for attachment style.
2. Bolt or screw bracket in position, tank must be in upright position if mounting.

*Note: Bolts and Screw diameter not to exceed 10mm/0.4"*

*Note: Two brackets required per tank mounted*

*Note: Use proper securing straps for harsh transport situations*

This product is designed for **securing 190mm Diameter Tanks** in a stable and appropriate mounting location. Improper installation or use **may result in damage to equipment, personal injury, or other hazards.**
